

## SECTION: CLAIM AMENDMENTS

Pursuant to 37 CFR 1.121, a complete listing of all claims in the application, and their status, is set forth below. The text of each pending claim is also provided. Please amend the pending claims as follows, wherein added matter is underlined and deleted matter is ~~stricken through~~ or ~~[[double bracketed]]~~ in the text of the currently amended claims, relative to the immediate prior version. The claims in this listing are deemed to replace all prior claims in the application.

1. (Currently Amended) A portable disc holder, the holder comprising a frame member adapted to surround a circumference of a disc and being at least partially in contact therewith, the frame member being provided with recesses and a ~~including~~ first integral flange means for preventing or inhibiting, in conjunction with the recesses, movement of the disc in the direction perpendicular to ~~the a~~ plane thereof, and remote from the first flange means on a generally opposite portion of the frame member a resiliently moveable second integral flange means adapted to restrain, in conjunction with the recesses, movement in the direction perpendicular to the plane thereof of an adjacent edge portion of the disc when the disc is mounted in the frame member, the resiliently moveable second flange means permitting entry of the disc into the frame member following resiliently deformation of the second flange means, the holder further comprising a closed slot formed in the frame member adjacent to the second flange means, whereby the second flange means is resiliently movable by virtue of the closed slot.

2. (Previously Presented) A disc holder as claimed in Claim 1, wherein the first flange means remote from the resiliently moveable second flange means is also resiliently moveable.

3. (Canceled).

4. (Previously Presented) A disc holder as claimed in Claim, wherein the resiliently moveable flange means is angularly moveable to permit entry or removal of the disc.
5. (Previously Presented) A disc holder as claimed in Claim 1, wherein the frame member has a back cover and a hinged front cover.
6. (Original) A disc holder as claimed in Claim 5, wherein the hinged front cover carries a projection at or near a leading edge thereof cooperable with a correspondingly shaped recess in the frame such that the front cover can be closed in a snap-fit and released in the same way.
7. (Previously Presented) A disc holder as claimed in Claim 1, wherein the disc holder is provided with a separate sleeve into which the disc holder and a disc may be inserted.
8. (Canceled)
